Practical 3 Part 1 (4, 5, 6) tasks

Task 4: ATM stimulator

Withdraw:

balance check:

deposit:

code:

```
script.html x script.txt +
File Edit View
<script>
let balance = 10000;
let transaction = prompt("Enter transaction type (withdraw, deposit, balance):");

switch (transaction) {
  case "withdraw":
    let w = prompt("Amount?");
    if (w <= balance) {
      balance -= w;
      console.log("New balance: ₹" + balance);
    } else {
      console.log("Insufficient balance.");
    }
    break;

  case "deposit":
    let d = prompt("Amount?");
    balance = Number(balance) + Number(d);
    console.log("New balance: ₹" + balance);
    break;

  case "balance":
    console.log("Current balance: ₹" + balance);
    break;

  default:
    console.log("Invalid transaction.");
}
</script>
```

Task 5 : AI Emotion Detector (Imperfect Inputs)

Output: -

Code :-

```
<script>
let sentiment = prompt("Enter sentiment score (-10 to +10):");
let keyword = prompt("Enter a keyword (e.g., tired, excited, confused):").toLowerCase();

if (sentiment >= 7 && keyword !== "tired") {
    alert("😊 You seem happy today!");
} else if (sentiment <= -5) {
    alert("😓 I'm here if you need to talk.");
} else if (sentiment == 0 && keyword === "") {
    alert("😐 I'm not sure how you're feeling. Want to tell me more?");
} else if (keyword === "confused") {
    alert("🧐 Let's figure it out together!");
} else if (keyword === "tired") {
    alert("💤 Maybe it's time for a break.");
} else {
    alert("😊 Thanks for sharing your feelings.");
}
</script>
```

Task 6:- Game NPC Decision Logic (With Unpredictable Player Behavior)

Code :-

```
<script>
function npcDecision() {
    let health = prompt("Player health (0–100):");
    let reputation = prompt("Player reputation (-50 to +50):");
    let inventory = prompt("Inventory item (e.g., sword, magic ring, none):").toLowerCase();

    if (health < 30 && reputation > 20) {
        alert("NPC decides to help you with healing.");
    } else if (reputation < -40 && inventory.includes("legendary")) {
        alert("NPC is cautious but respects your item. Offers a trade.");
    } else if (health > 80 && reputation < 0) {
        alert("NPC stays alert—remembers past betrayal.");
    } else {
        alert("NPC greets you neutrally, unsure of your intent.");
    }
}
```

```
}  
  
npcDecision()  
</script>
```

Output:-
